Moreover, it is an innovative healthcare technology and analytics application, offering a complete health and wellness management system.

Let's Go

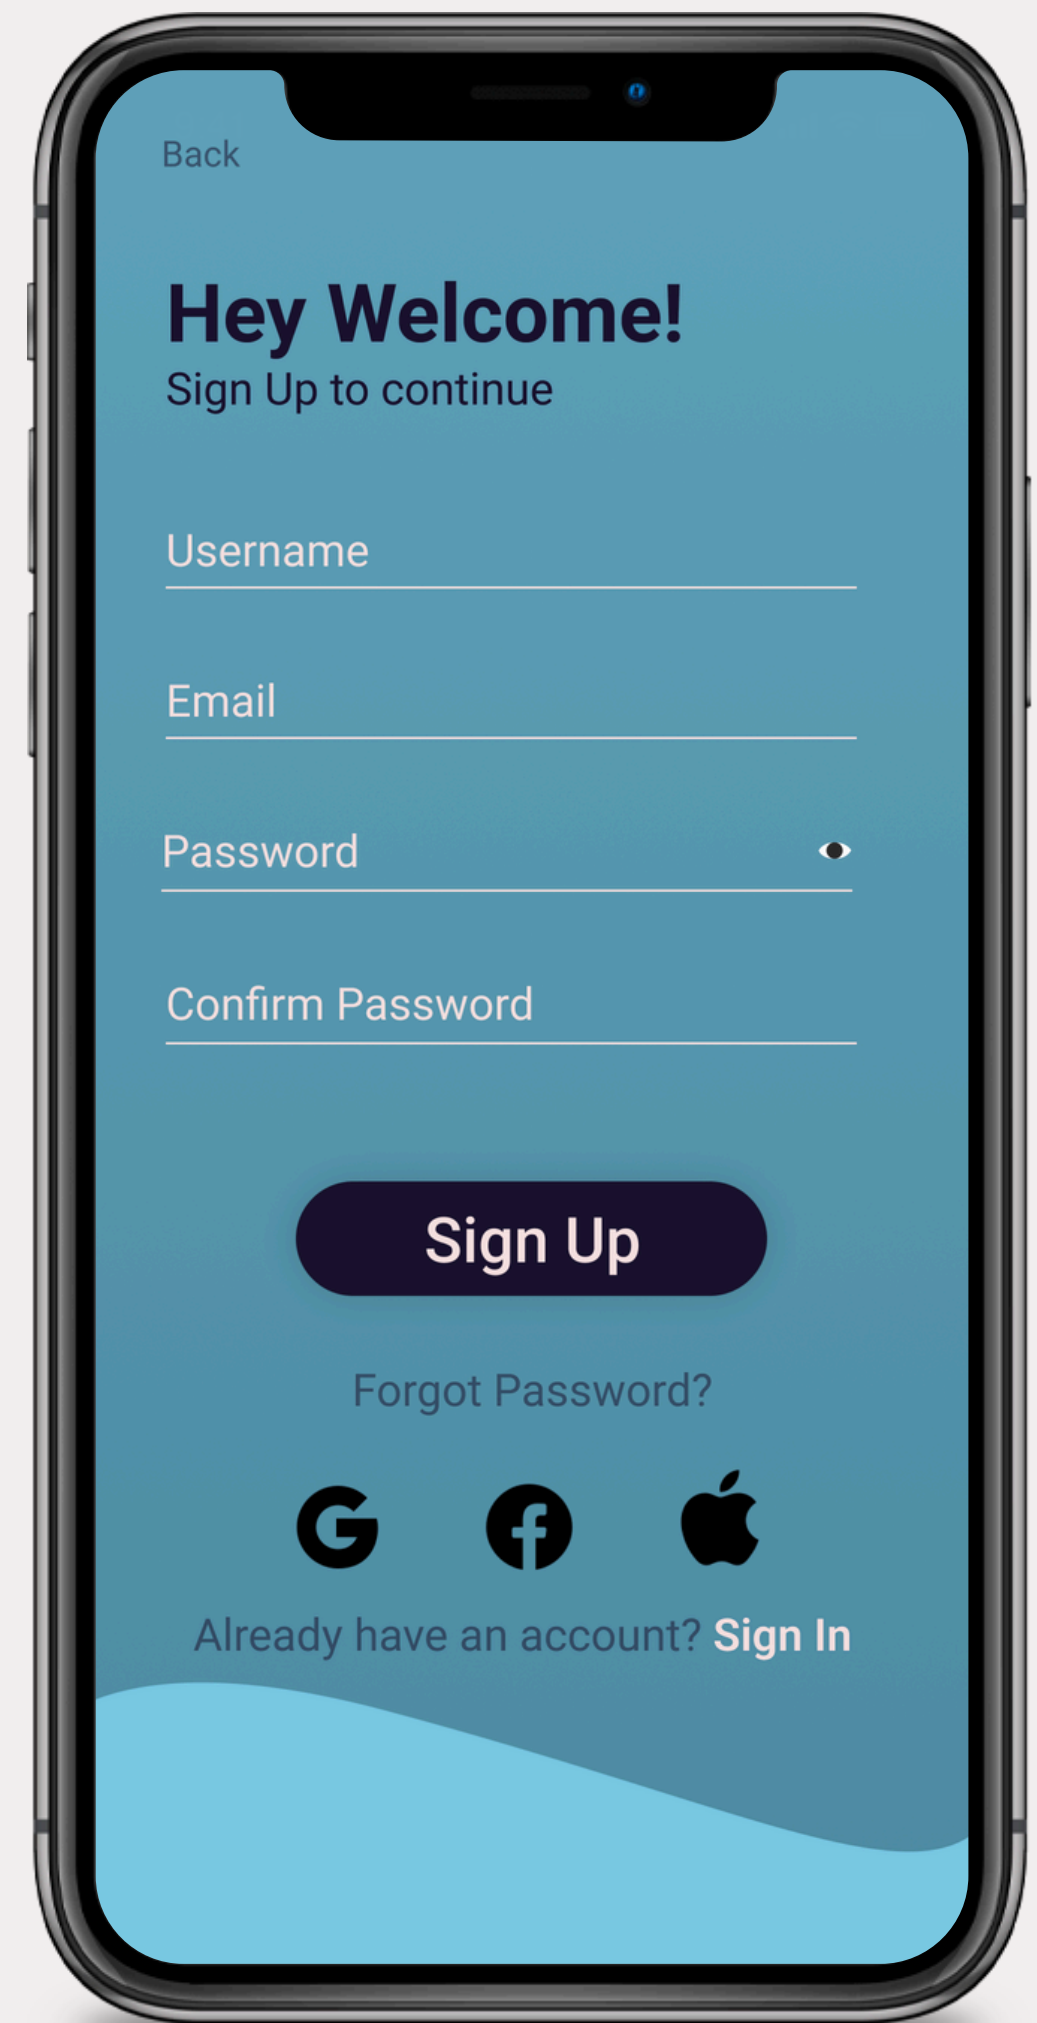

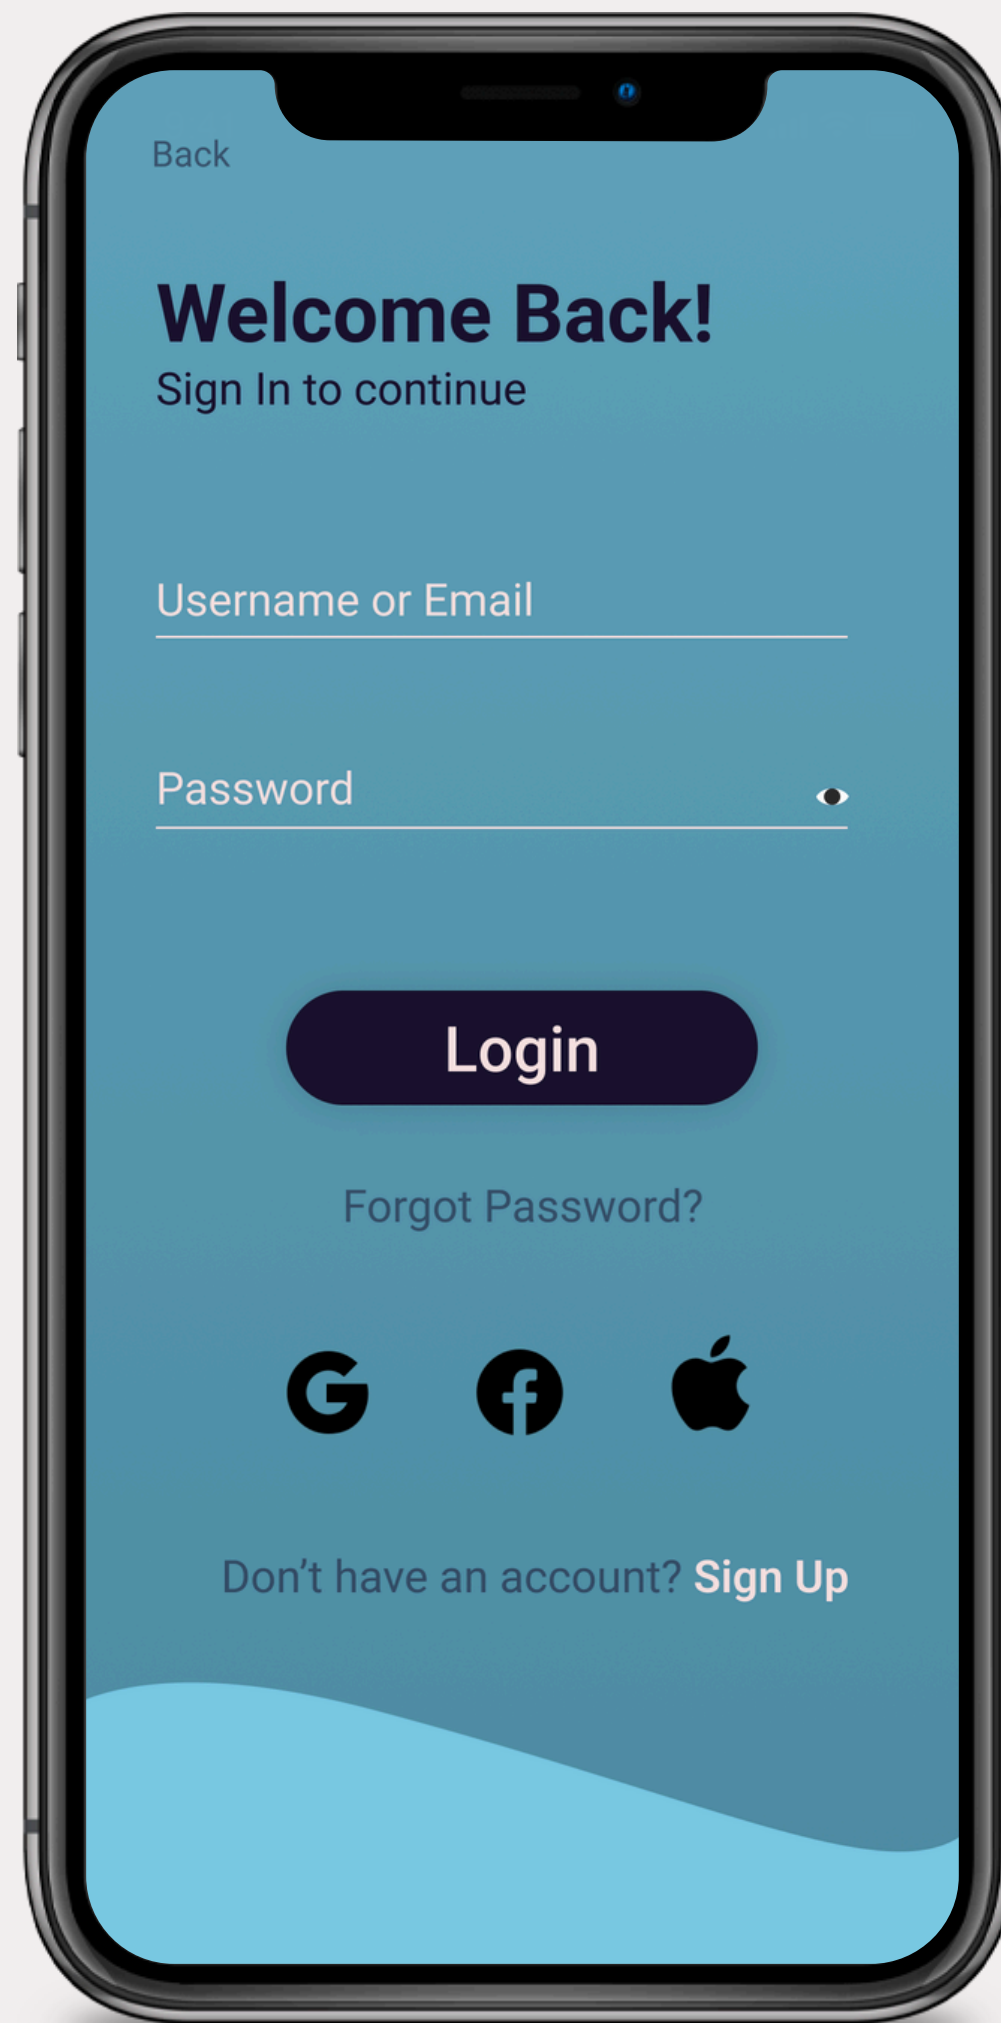

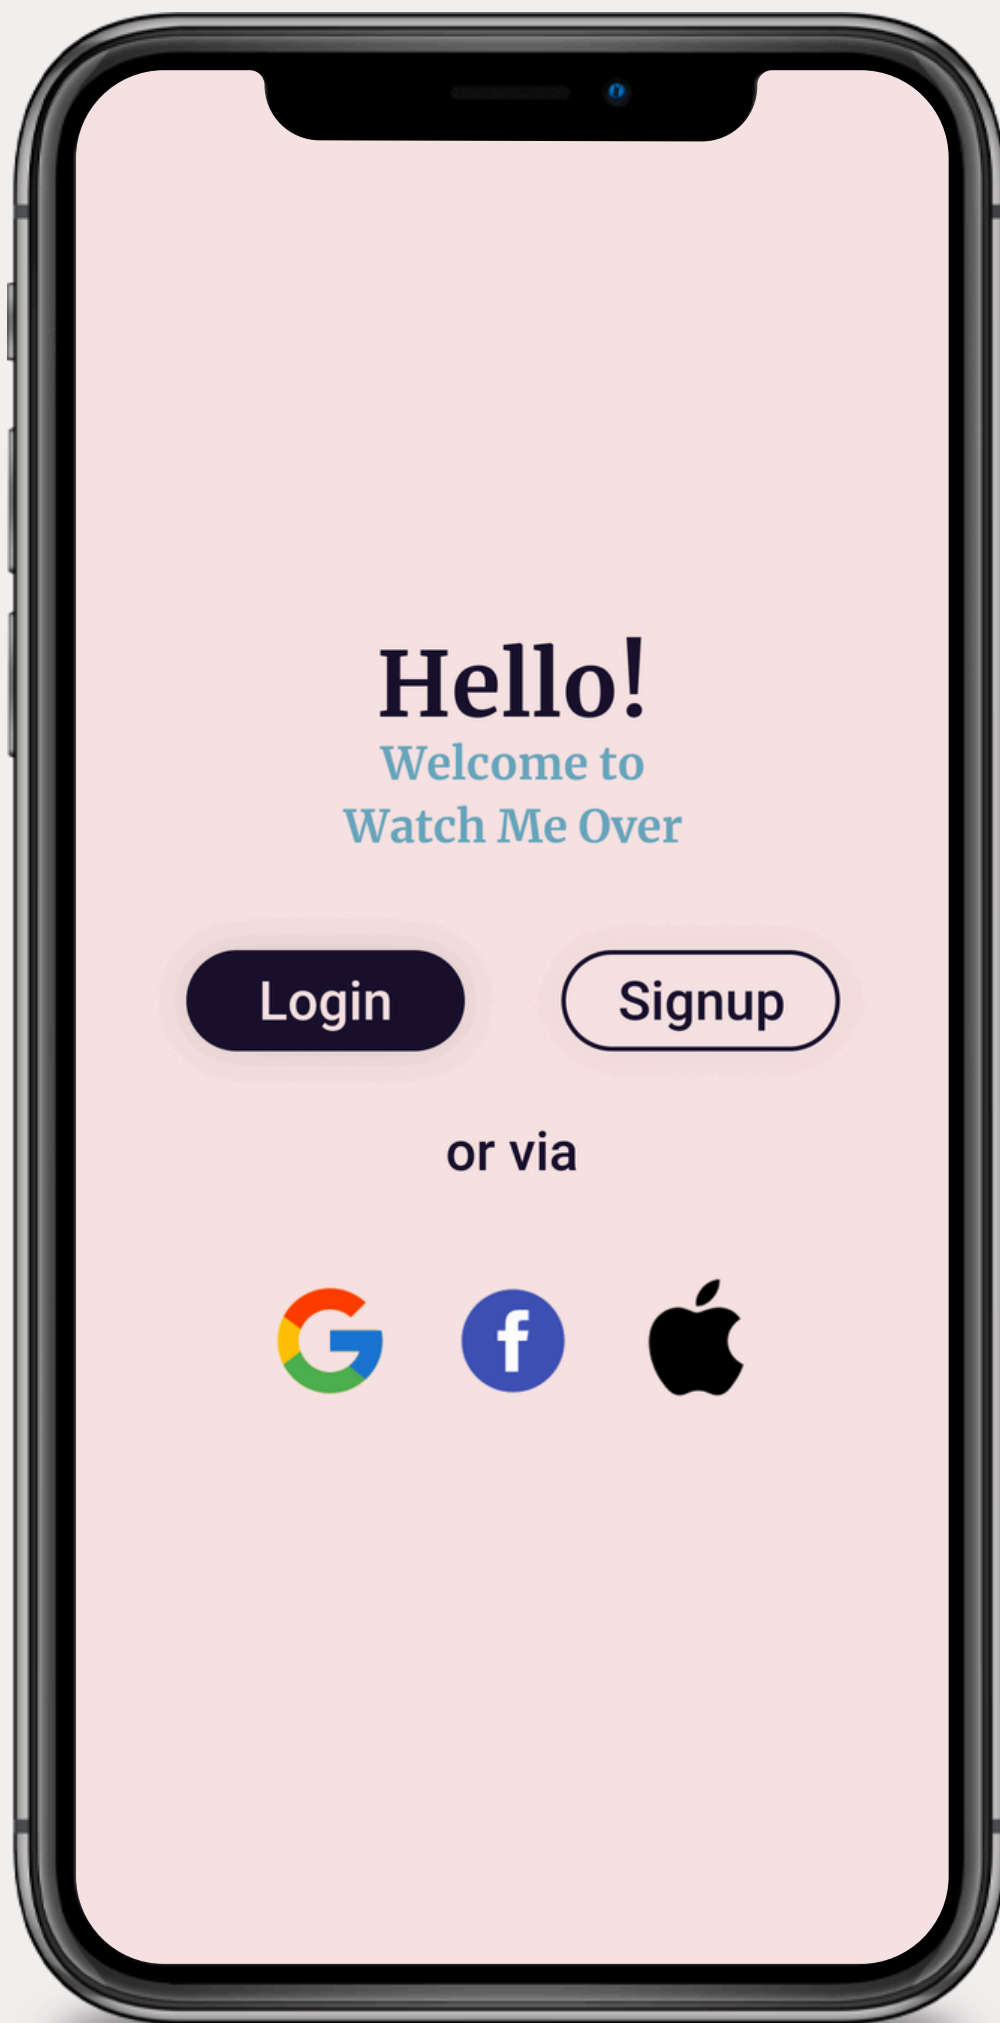

SOS EMERGENCY

ONE OF THE MAIN FEATURES THAT MAKES THIS APP STAND OUT FROM THE PRE-EXISTING SOS SERVICES IS THAT AN AUTOMATIC MESSAGE ALERT IS SENT TO THE SAVED CONTACTS IN THE CASE OF ANY UNFORESEEN OR UNFORTUNATE INCIDENTS BY MONITORING ANY DRASTIC CHANGES IN YOUR BLOOD PRESSURE AND HEART RATE.

This app will display a notification when your lock screen is present. Most of the time the notification will be contracted. By default, to see the information you can either click on the notification to display full screen page or use 2 fingers to expand/collapse the notification

Next

PROFILE

ONCE YOU REGISTER YOURSELF TO THE APPLICATION, THE APP WILL ASK YOU TO ENTER YOUR BASIC PERSONAL DEATILS, LIKE HEIGHT, BODY WEIGHT, D.O.B, GENDER, ETC. YOU CAN ALSO JOURNAL YOUR BODY CHANGES AND TRACK IT THROUGH WEEKLY OR MONTHLY STATISTICS.

SYNC WITH YOUR WATCH

After that, all your personal data will be synced with your watch via Bluetooth so as to give easily accessible statistics and overall analysis on the go.

SYNC WITH YOUR WATCH

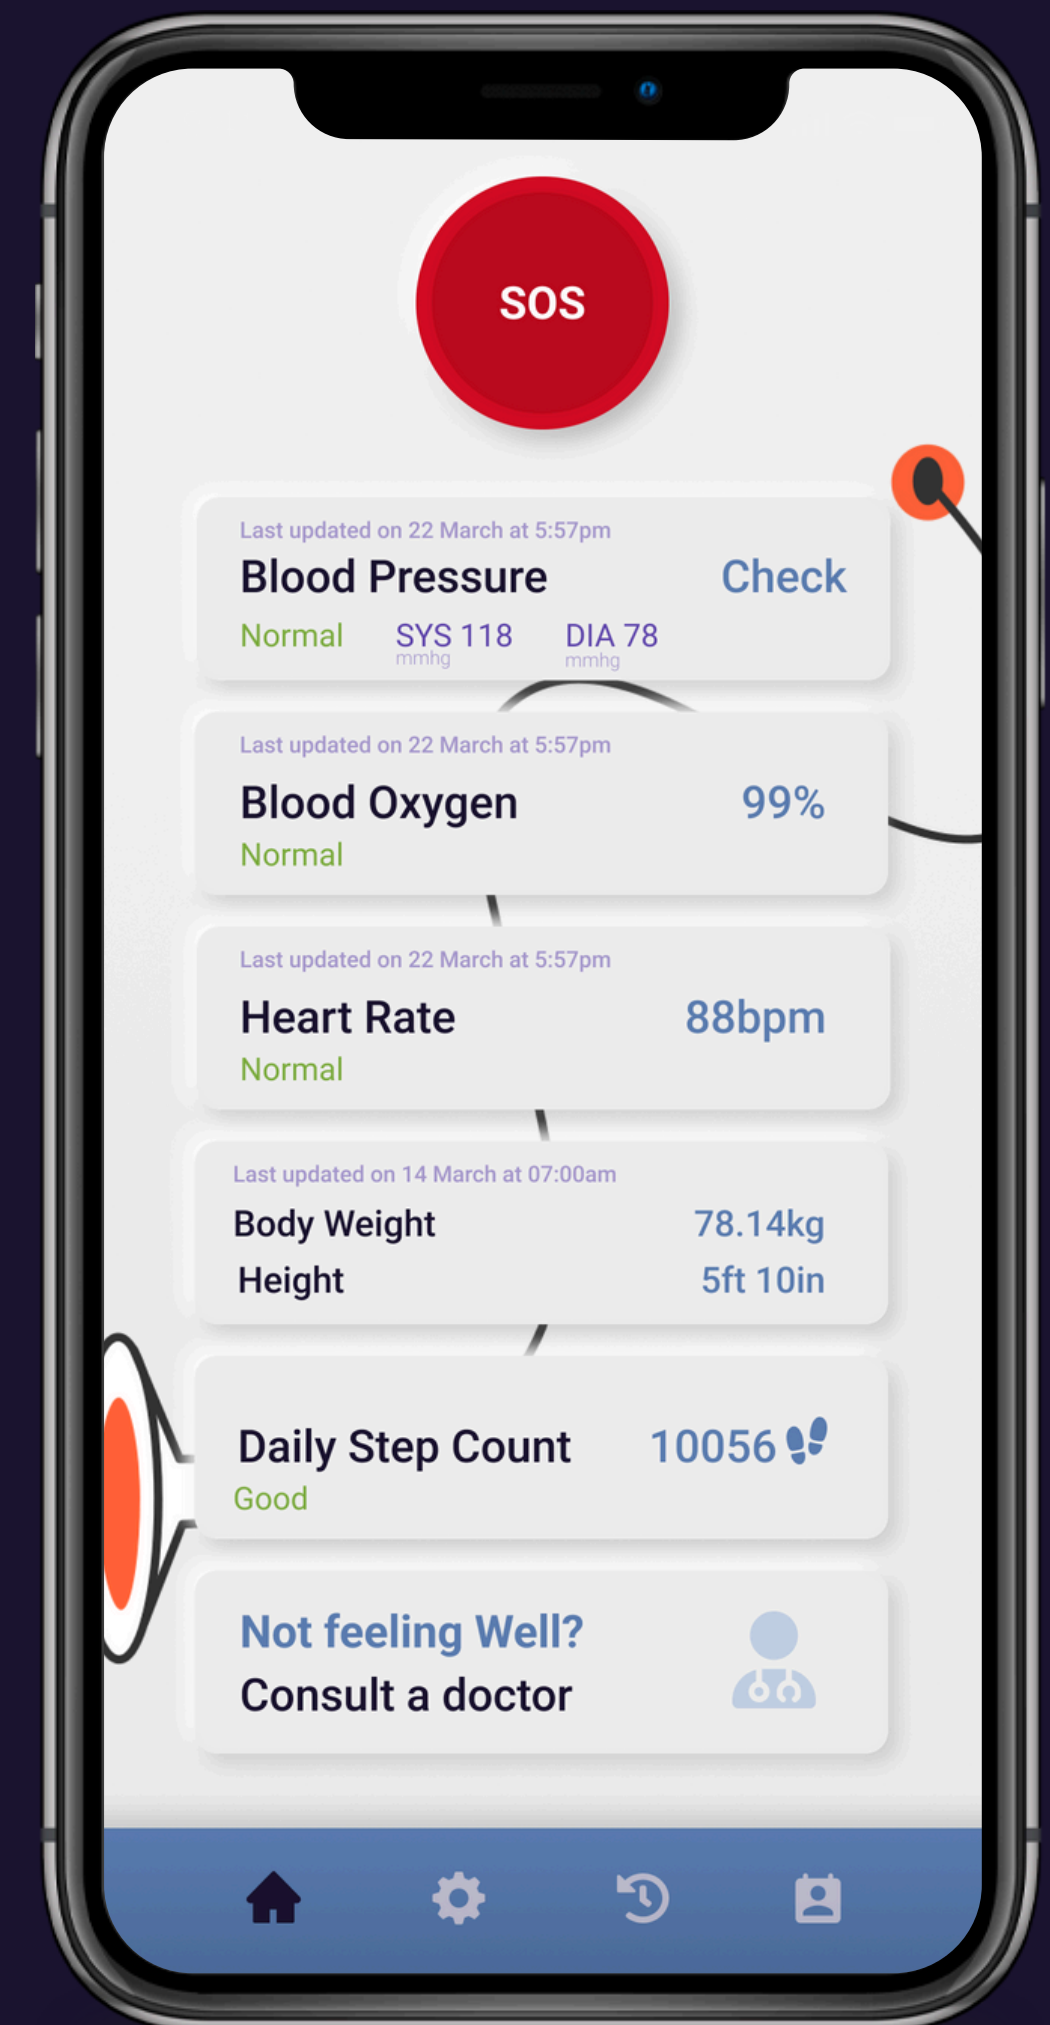

After that, all your personal data will be synced with your watch via Bluetooth so as to give easily accessible statistics and overall analysis on the go.

HOME

Then we will be guided to the home page of the app. It offers a list of all the active features that the app comprises of, namely-

- An SOS button
- Blood pressure detection
- Blood oxygen level
- Heart rate detection
- BMI calculation
- Daily step count
- Recommended professional consultancy

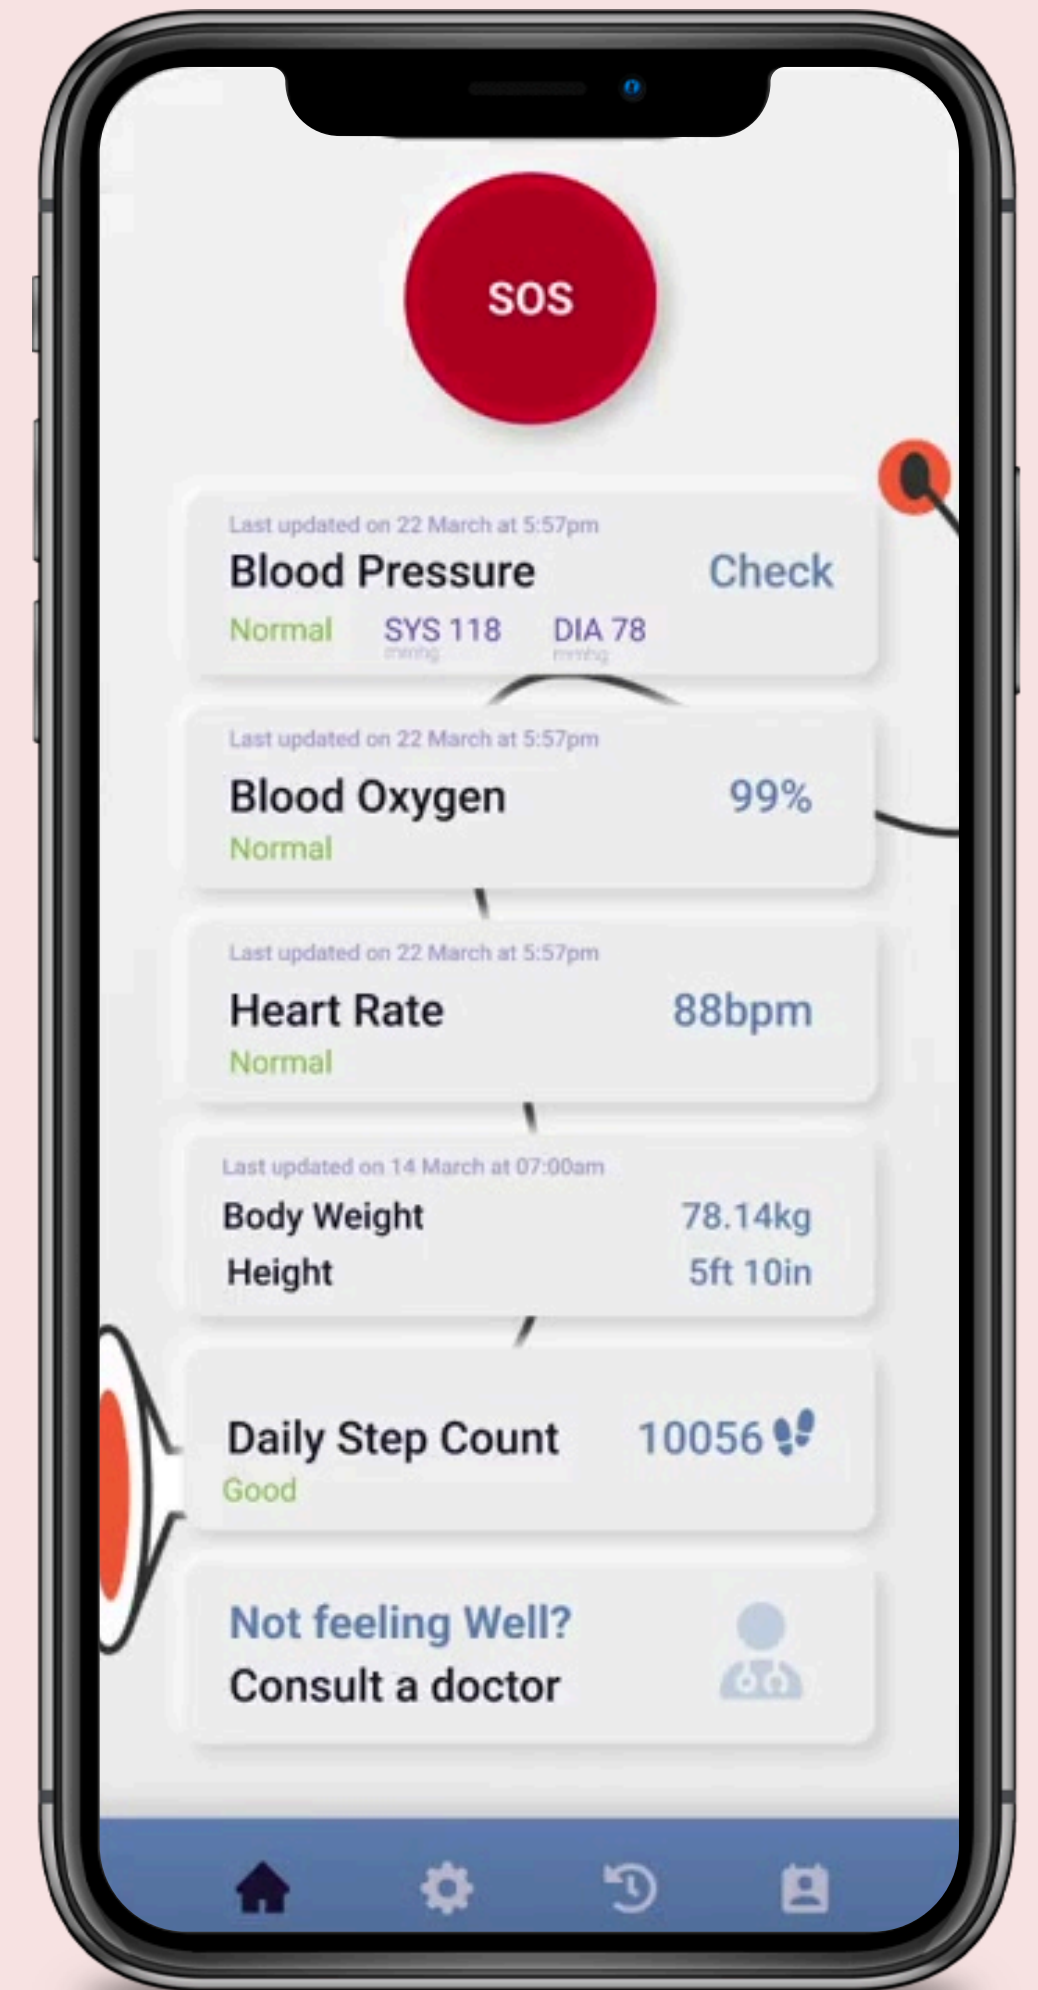

MANUAL SOS

Apart from the automated SOS that is sent if a severely irregular or unnatural pattern of heartbeat is recorded, if an individual is not feeling well in general, he can hold this red SOS button for 3 seconds and then too, an emergency alert will be send to the saved contacts.

MEASURE BLOOD PRESSURE

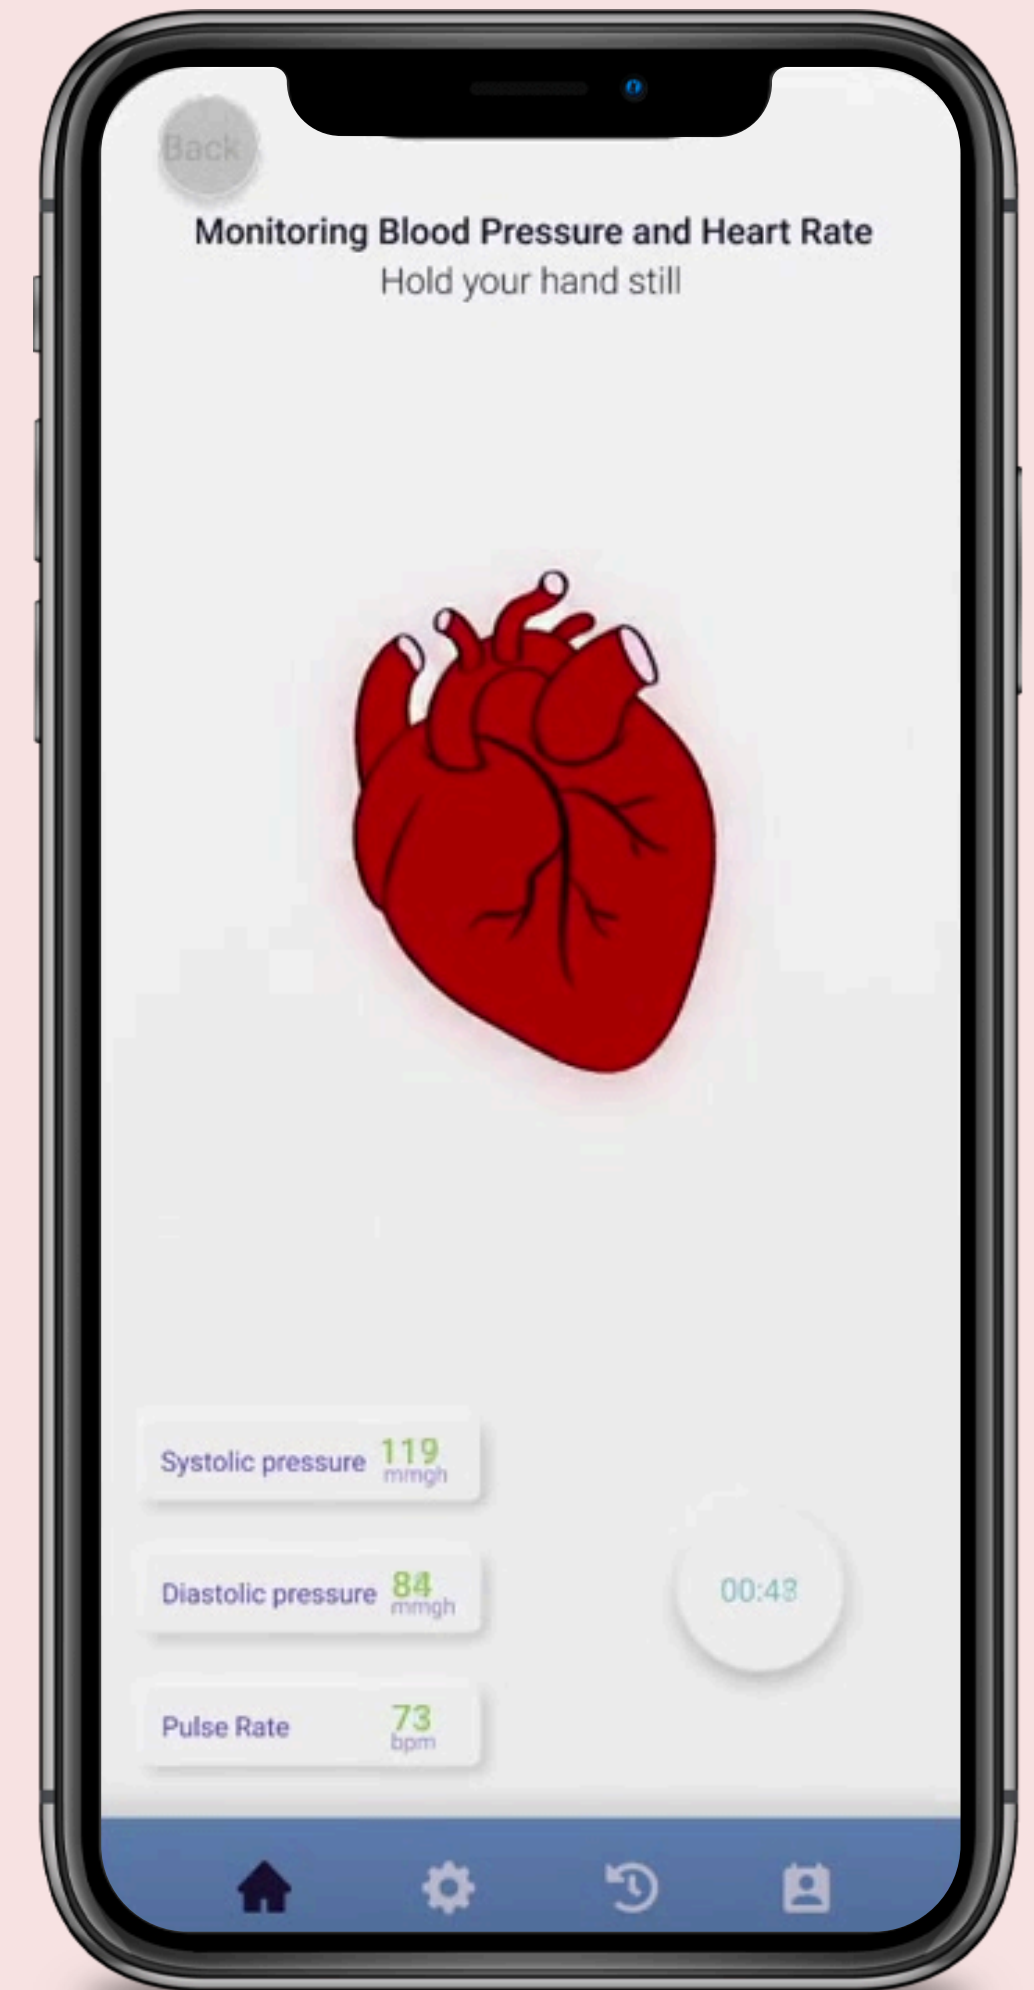

An individual's live blood pressure can be observed in the blood pressure window and in case of minor ups or downs, quick remedies are also prompted. This live blood pressure diagnosis can also be shared with anyone through any medium.

NAVIGATION THROUGH THE APP

Towards the bottom of the screen, we have four tabs, which include-

- Home page as discussed earlier.
- Settings page- It is where we can alter our personal information at any time.
- History and Statistics- We can look through our past Statistics and track our improvement, or even share it with people.

Why is this app a good fit in today's world?

This app is a great way to combat and deal with emergency health and medical conditions. And develops a sense of safety and security among people, in turn, avoid panick in tough situations and helping to deal with them smartly. The wide range of features provided are very interesting as well as interactive which makes it an even better experience.
